

Microphone Management Hardware

All of the Heil mounting systems have brass inserts that allows the boom to move very smooth and quiet.

- FL-2
- RS-1 Riser
- DT-1 Desk Top flush mount
- WM-1 Wall Mount
- C Clamp

FL-2 The optional FL-2 "Flange Mount" allows the PL2T to be permanently mounted to a desk or table top with the three supplied screws. The Heil FL-2 Flange Mount also has a security lock so the PL2T can be tightened to the exact position desired.

RS-1 is a 12" riser that allows you to mount the Heil PL2T behind your radio and pull the PL 2T over the radio. A VERY classy way to position your Heil microphone.

DT-1 is a flush mount for the PL 2T. Drill an 1 1/2" hole in the desk top. Tighten the large washer and nut of the DT-1 under the desk. The absolute classy mount for all Heil booms.

WM-1 is a unique mount for the Heil booms to mount on a vertical surface. Brass insert insures smooth perfect fit.

The Heil "Topless" booms are the quietest and smoothest moving in the industry!
