

MFJ-948

HF Deluxe Antenna Tuner w/ Meter, Antenna Switch & Balun

The MFJ-948 Antenna Tuner has nearly all the features (except dummy load) of the MFJ-949E -- the World's leading 300 Watt antenna tuner.

Full 1.8-30MHz Operation

Custom designed inductor switch, 1000 volt tuning capacitors, Teflon insulation washers and proper L/C ratio gives you arc-free no worries operation with up to 300 Watts 1.8 to 30 MHz.

Tunes any Antenna

Tunes out SWR on dipoles, verticals, inverted vees, random wires, beams, mobile whips, shortwave receiving antennas.... Nearly anything! Use coax, random wire or balanced lines. Has heavy duty 4:1 balun.

Custom Inductor Switch

The inductor switch is the most likely component to burn up in any antenna tuner. MFJ's inductor switch in the MFJ-948 was custom designed to withstand the extremely high RF voltages and currents that are developed in your tuner.

8 Position Super Antenna Switch

Lets you select two coax fed antennas, random wire/balanced line or external dummy load (not included) through your MFJ-948 or direct to your transceiver.

Full Size Lighted Cross Needle Meter

Has MFJ's full size 3 inch lighted Cross Needle Meter (not a puny "meter" you can't read). Lets you easily read SWR, true peak forward and average reflected power simultaneously on 300 Watt or 30 Watt ranges. Lamp has on/off switch, requires 12 VDC or 110 VAC with MFJ-1312D.

Plus much more!

Scratch-proof Lexan multi-colour front panel, superior cabinet and construction and more!
