

MH-C777PLUS-II

Universal LCD Charger / Analyzer / Conditioner

- ▶ Universal design like its predecessor the MH-C777 accommodates almost any battery pack for digital cameras, two-way radios, cellular phones, camcorders, individual battery cells and more.
- ▶ Analyze (Discharge Only Function) the battery pack to obtain the discharged capacity of a battery pack, which is retained on the screen until the reset button is pressed.
- ▶ One-Touch Reset button allows the user to reset the charger without having to disconnect power from the charger.
- ▶ Supports Lithium Ion, Lithium Polymer, NiMH, and NiCD battery chemistries.
- ▶ Supports a wide voltage range of 1.2V to 14.4V (1 to 12 cells) for NiMH & NiCD, and 3.6V to 14.4V (1 to 4 cells) for Lithium Ion.
- ▶ In addition to battery packs, you can also charge 1 to 12 cells of AA, AAA rechargeable battery cells and alike. The possibilities are endless! *(Requires battery holders not available from Maha. Visit your local electronic store to purchase ones that fit your requirement)*
- ▶ Intelligent microprocessor driven Negative Delta V detection, Zero Delta V, and Delta Temperature.
- ▶ Analyze and condition battery packs and display capacity.
- ▶ Digitally display voltage, time, and capacity throughout the charge and discharge processes.
