

SEC-1223 23 Amp Switching Power Supply

These advanced switch-mode DC power supplies were designed specifically for use with land mobile radio. The power supplies produce clean reliable power and are highly filtered to suppress RFI.

Specifications						
Model#	Input Voltage	Output Voltage	Dimensions	Output	Fuse Rating	Shipping Weight Lbs.
SEC-1223	100-130 or 200-260VAC	13.8 VDC	2.4 x 7.3 x 8.7	23 Amps	6.3A	4
Applications						
Two way radio base stations Communications systems Security systems Test equipment Plotters GPS receivers Automotive & Marine displays DC computers 12 Volt lighting systems OEM applications						
Design Features						
Advanced switch-mode technology Reliable power with minimum weight and size Circuit innovations minimize output voltage ripple and RFI Input voltage can be set at 120VAC or 240VAC UL listed to both USA & Canadian safety standards.
