

# **Wilson Antenna**

**World's Most Powerful Fiberglass CB Antennas**

## **Wilson Flex CB Antenna**

Patterned after the proven performance of the Wilson FGT fiberglass antennas, the Wilson Flex antenna out performs all similar types of top loaded flex fiberglass antennas.

It is designed specifically for the CB user requiring an antenna that will take the rigorous vibrations from a truck, handle rugged use, the extreme changes in cold weather, and still perform well.

- Adjustable tip for fine tuning SWR & resonant frequency
- Exclusive impedance matching transformer lead
- 1/4" tapered fiberglass rod
- Fully linear top loaded for maximum transfer of power out of antenna ( better than helical winding )
- Spaced windings to reduce dielectric heat loss
- 22 gauge silver plated wire to reduce resistive losses
- Special rubberized covering for weather protection
- Static reducing weather cap
- 3/8" X 24" standard threaded mounting
- Weather Channel Ready
- Available in Black only
- Sizes available: 3', & 4'
- 1 Year Warranty
